TIME ATTENDANCE SOLUTION

SEAMLESS TIME ATTENDANCE MONITORING SYSTEM REDUCES OVERHEAD, MINIMIZES ERRORS

iGuard, a time attendance system, utilizes *patented embedded web server technology* combined with *biometrics* and *smart card* authentication. This is the world's **ONLY** available system that has achieved advanced operability using world-renowned *TCP/IP* networking protocol without having to compromise on security. A *stand alone* device that is location and platform independent, which is capable of running on various networks - the public Internet, GSM, GPRS and Wireless LAN.

TRANSPARENT SIMPLICITY

- A *24/7 time management* solution that is easy to use and manage.
- Simple access and download procedures via any standard web browser.
- *TCP/IP* allows for multiple location coverage.
- Allows you to keep track of employee attendance and time attendance records, irrespective of geographic location.
- Gather necessary data remotely at the central office from various remote locations.
- Can access individual devices from the corporate LAN or the public Internet.

SEAMLESS INTEGRATION WITH EXISTING PAYROLL APPLICATIONS

- Supports *3rd party payroll applications* for complex payroll calculations in various situations.
- Logs are retrievable in *Excel* or *Text formats*, or can be stored in *ODBC* format.
- Supports simple payroll calculations using Excel formulas.
- Generate reports and deliver useful information to your payroll software or service provider.

OPTIONAL iGuardTA Software

- **SIMPLICITY** - Familiar Windows controls for easy & straight-forward navigation & set up.
- **FLEXIBILITY** - Access based program has many standard features for editing, reports & payroll.
- **ECONOMY** - Start with 50 users and grow as your company grows.
- **FULL SERVICE** - Download, edit, set shifts, policies, paid time off, departments, reports & payroll export.

iGUARD

KEYLESS SOLUTION

A SAFE AND RELIABLE SECURITY SOLUTION FOR HOMES AND OFFICES

Most security systems available in the market nowadays can only offer limited security protection. Despite their claims, most systems are not foolproof. Their claimed security can easily be breached, and thus inadvertently defeat its sole purpose. Moreover, hidden costs, such as installation, maintenance, and implementation costs are enormously high.

iGuard, however, offers you with a multitude of services to heighten security levels at the lowest possible cost. Its *patented web server* technology eliminates the need for expensive and cumbersome dedicated PC's or specified IT personnel, while providing you with *maximum flexibility* and *convenience*.

SAFEGUARD YOUR HOME AND OFFICE WITHOUT GEOGRAPHIC RESTRICTIONS

- A 24/7 security management solution for both residential and business use.
- Specifically developed for various scenarios, from *residential, remote, virtual or remote offices to multi-location offices - locally or worldwide.*
- Optimizes cost savings, maximize revenue and enhances profitability and efficiency.
- Generates a high return on investment (ROI) from an operational standpoint.

FIVE POSSIBLE WAYS TO ACCESS iGUARD

- Fingerprint Only
- Smart Card Only
- Password Only
- ID + Fingerprint
- Smart Card + Fingerprint

SECURITY FEATURES

iGUARD offers you a *user-friendly* and foolproof security device by utilizing the "*Best of Class*" *Biometrics Fingerprint* and *Contact-less Smart Card* Authentication to provide you with exceptional security at an affordable price.

REAL TIME SOLUTION

iGUARD provides you with the ability to *control*, *configure*, and *administer* your residence and/or office properties with any standard web browser over the corporate network, or through the Internet with *real time* data with no additional software or hardware installations.
